High Temperature TPU

PU9414 is the new generation polyurethane developed by **Kastas Sealing Technologies** that combines excellent viscoelastic properties and extrusion resistance for high temperature applications.

- High Temperature Resistance
- Superior Abrasion Resistance
- Hydrolysis Resistance
- High Extrusion Resistance

The new **PU9414** polyurethane assures better results and life-time than other polyurethanes in the market with its superior properties that have proven itself in long time tests both in-house and also at the field.

PU9414 polyurethane has superior extrusion resistance even at extreme temperatures.

PU9414 is recommended for the following designs:

Rod Seals: XT200®, FR200®, K31, K33

Buffer Seal: K29

Wipers: K05, K107

The new premium polyurethane **PU9414** is developed for challenging applications and extreme operating conditions where high temperature resistance is required. **PU9414** can be used in various seal designs, mainly rod seals for mobile equipment and generally all heavy duty applications where extrusion, high temperature, abrasion resistance are required at the same application. **PU9414** is the ultimate solution for all cylinders that are exposed to high-temperature painting process.
